

IBRAHIM POPATIYA

AI & SOFTWARE ENGINEERING ENTHUSIAST | COMPUTER
ENGINEERING GRADUATE (2025)

PROFILE

Motivated Computer Engineering student with hands-on experience in building AI-powered applications and automation tools. Skilled in Python, FastAPI, and PyQt5 with projects ranging from intelligent resume screening and deep web search to custom screenshot utilities. Strong problem-solving ability with a passion for creating real-world solutions that integrate AI, automation, and user-focused design.

WORK EXPERIENCE

AI-Powered Resume Screening Agent

- Built an AI agent that analyzes resumes, answers recruiter queries, and provides feedback on candidate suitability.
- Used Python, FastAPI, OpenAI APIs, and Gradio to build agents and tools that parse resumes and provide conversational responses.
- Impact: Helped recruiters reduce time spent on screening large volumes of resumes and improved efficiency in shortlisting candidates.

Deep Search Automation Tool

- Developed an AI-powered deep search engine that extracts data from the web and automatically sends emails to respective clients.
- Integrated Python, SendGrid API, and web scraping techniques to collect and deliver targeted information.
- Automated repetitive client research and outreach tasks, saving significant manual effort and speeding up communication.

Smart History Viewer & Screenshot Tool

- Created a desktop utility for viewing browser history and taking custom screenshots with annotation support.
- Built using Python, PyQt5, and system APIs for browsing history and image manipulation.
- Provided users with an efficient productivity tool for tracking past activity and capturing screen content effectively.

AI Agents & Custom Tools Platform

- Designed a framework for building AI agents that can create orders, retrieve bills, fetch payment history, and monitor inventory.
- Leveraged OpenAI APIs, function calling, and custom tool integrations within a modular agent runner structure.
- Simplified business management tasks and improved decision-making by automating workflows through natural language.

SKILL

Programming & Development

- Python
- FastAPI
- SQL

AI & Data :

- Agentic AI workflows
- Prompt engineering & LLM integration

Other Skills:

- Problem Solving
- Debugging
- Building Scalable Projects
- Research & Documentation

EDUCATION

Dr. Babasaheb Ambedkar
Technological University
Nanded.

**BTech Computer Science and
Engineering**
